A truly world-class team of dedicated fluids experts

We are the fluids people. As the leading global, pure-play, independent experts we are proud to attract and develop the best fluids specialists in the business.

Unlike integrated service companies, fluids are our team's sole focus. Not only putting us in the perfect position to deliver the right fluids solution for your unique needs, but also to pass that knowledge on.

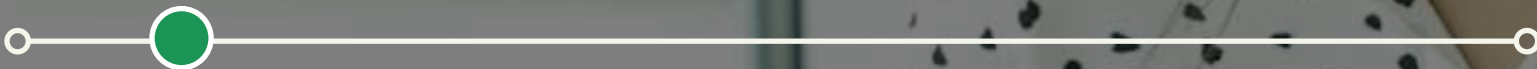

Sharing expert insight and best practices directly with your team in the field, through specialist fluids training and as part of our premium content and webinar series.

FLUID THINKING

People competency

Expertise and experience matter

Our field engineers have earnt their industry-leading experience in the plays you call home. Giving our people an unparalleled understanding of the unique needs of many diverse formations across the industry globally. Not to mention a fluids-first approach that guarantees you the competency your operation needs – from the laboratory to the field.

Continuous development

From the moment our drilling specialists join Newpark, they begin a journey of continuous professional development. Based out of our state-of-the-art global talent development facility in Katy, we work hard to give our team all the skills, knowledge, experience and ability they need to make proactive ecisions to optimize your operations. Our team competencies are regularly reviewed and benchmarked all the way up from fluids foundation to fluids mastery levels.

Customer training

It's not just our team that benefit from our drive to remain at the forefront of fluids knowledge. We also offer customer training opportunities at least six times a year – with additional sessions available on request. You can also register to receive access to our premium digital content for free in just a couple of clicks below.
