Anticipate and overcome challenges. Every step along the way.

As the only global pure-play independent fluids specialists – we know how to give you that performance edge. Our full range of fluids and end-to-end fluids-related services have been designed to help you anticipate and overcome the most challenging conditions around the world. Minimizing losses and maximizing productivity for the most profitable and sustainable wells possible.

Stay one step ahead. From end-to-end.

Drilling fluids solutions

Combining the latest digital technologies, world-beating service and field-proven performance with a truly groundbreaking approach to fluid chemistry – we’re changing the way the industry thinks about drilling fluids..

Reservoir fluids solutions

Completions require specialized expertise. Realize the full potential of your assets by protecting the reservoir from damage to extend its lifecycle with our array of reservoir-focused solutions.

Stimulation fluids solutions

Discover how our range of reservoir stimulation fluids and additives keep you ahead of the curve to maximize your Estimated Ultimate Recover (EUR).

Outplay your most technical challenges

Deepwater and offshore wells

Mitigate your risks with fluids solutions engineered for the most extreme demands – from temperature changes and pressure drops to extreme depths.

[Read more >](#)

Critical wells

We understand your formation and best-in-class engineering solutions – enabling you to anticipate and deal with issues such as shales and HPHT wells effectively.

[Read more >](#)

Unconventional wells

Keep everything running to plan with our selection of highly efficient solutions specially engineered to protect the narrowest of operating margins.

[Read more >](#)

Lost circulation

Avoid the cost of lost fluid and circulation with proactive strategies that reduce drilling time and costs. Protecting your margins and your well's economic performance.

Our service advantage is your leading edge

We are the fluids people. By tapping into our team of experts, global supply chains and diverse industry-leading portfolio of fluids systems – we are uniquely positioned to deliver custom fluids solutions for your unique operation. With an exceptional level of service from end-to-end empowered by digital tools.
