## A safe and sustainable service you can trust

It's crucial for us to be able to deliver exceptional quality for our clients in the safest, most sustainable and environmentally friendly way.

Our global operations are managed by a single QHSE system designed to create a zero-harm workplace while establishing practices to protect the environment and contribute to the sustainable growth of the company. All the time. Everywhere.

### Quality

We set our standards on a global scale. Ensuring consistent and outstanding customer service, supplier performance and product quality – no matter where in the world your operation takes you.

### Health & Safety

We believe zero harm is possible. Our safety keystone rules are the backbone of our safety program – helping us to establish the minimum mandatory standards and guidelines for all activities.

### Environment

We're always aspiring to a better world – from environmentally compliant fluids solutions, efficient stimulation products and completion technologies to greener and cleaner logistics, ethical supply chains and supporting our employees.
